

JLL advises INRG on the sale of Little Crow to British Solar Renewables

INRG sells Little Crow – a Nationally Significant Infrastructure Project of 150MWp solar PV + 60MW co-located BESS – to British Solar Renewables (BSR)

LONDON, 20 MARCH 2025 – INRG has successfully divested Little Crow, a 150MWp solar photovoltaic (PV) project co-located with a 60MW battery energy storage system (BESS), to British Solar Renewables (BSR). This Nationally Significant Infrastructure Project (NSIP), the second PV project to receive a Development Consent Order (DCO) in the UK, secured a Contract for Difference in Allocation Round 6. JLL's Energy and Infrastructure Advisory team acted as the exclusive sell-side advisor, bringing the total capacity JLL has advised on to over 5GWp of solar and 1.8GW of co-located BESS in the UK. BSR will build and operate the project, strengthening its position as an independent power producer.

The acquisition of Little Crow is part of BSR's ambition to construct and operate 700MW of renewable energy capacity by 2027 – enough to power 144,775 homes each year. Solar is a key part of the UK Government's renewable energy strategy. The acquisition of Little Crow will help drive the UK's 2030 clean energy targets.

Tim Humpage, Chief Executive Officer, BSR, said: "We're thrilled to have reached this significant milestone and to officially welcome Little Crow as a BSR project. We're excited to move into the delivery phase and to see it fully come to life through our design and construction."

Marcus Peech, Senior Director - Energy & Infrastructure Advisory, JLL, said: "We are proud to have supported INRG on this landmark transaction. The successful sale of Little Crow, the first advisor-led consented NSIP transaction in the UK, highlights the increasing maturity of the UK solar and the strong demand for large-scale NSIP assets."

About British Solar Renewables

British Solar Renewables (BSR) is a leading renewable energy developer with over a decade of experience in solar PV and battery energy storage systems (BESS). The company operates with a fully integrated platform, taking sites through development, construction and in operation. With a strong presence in both the UK and Australia, BSR is advancing a pipeline of nearly 18GW of projects collectively. BSR was acquired by ICG Infrastructure in July 2022 and is well-positioned for future growth to strengthen their capabilities. For more information visit: <https://britishrenewables.com/>.
